Discovery Through Immersion

We are all explorers

With the spirit of adventure at heart. For some it's about pushing the boundaries of human endeavour. While for others it's about overcoming the everyday challenges.

We believe passionately in the power of change. Together let's go deeper and further, changing attitudes and shaping the future of our industry.

We design and implement umbilical and cable solutions from the surface to the seabed for the offshore energy, ROV, diving, and seismic industries.

We use a keen knowledge of our environment, combined with innovative thinking, materials testing and analysis to provide products that meet any challenge.

Our values

Safety

Everyone needs to get home safe, no matter their role in the company. Let's make sure safety is always front of mind. It's everyone's responsibility, alongside ensuring our equipment and training are up to date.

Integrity

Do what you say you will do, and do the job to the best of your ability.

Don't promise what you can't deliver to please others. Take pride in your job and responsibility for your actions.

If mistakes are made, don't hide the problem. We are all in this together, tell someone and let's find a solution.

Development

Let's create an environment where our people are willing to learn, help and listen. Let's create training methods that are flexible, which cover both the operations and office environment. Let's empower our workforce to grow and realise their potential.

Relationships

Team work is important, let's help each other. Don't be afraid to ask for help, we all need to support one another. Communication is the key and our diversity is a strength. Let's create a healthy working environment where anyone can talk to anyone in the company. Let's also make sure we welcome our customers, building these relationships.

Our markets and products

Offshore energy

- Dynamic - IWOCS, XT, THRT, LS, LV, annulus, circulation umbilicals
- Static - Plem to Buoy and SSIV umbilicals
- Static short length PCU, Tie-back and subsea jumpers
- HFL, EFL and jumpers
- Electro-optic-power-signal cables
- Terminations - Topside / subsea mechanical, electrical, hose and optic

Diving

- Bell, habitat, welding, EPRS, main services umbilicals
- Surface demand (Air dive and Nitrox) umbilicals
- Saturation excursion umbilicals
- Diver tooling umbilicals
- Hull cleaning umbilicals
- Atmospheric diving cables
- Diving (DCS) cables for comms, video, power, telemetry

ROV

- Main lift cables
 - Tethers
 - Trencher, Plough, Crawler cables
 - Pile Driver umbilicals
 - Pipeline inspection cables
 - Diamond mining umbilicals
-

Seismic

- Tow / Lead-In cables
- Air gun umbilicals
- Life of field cables
- Fairings
- Terminations

Special applications

- Defence cables and umbilicals
- Tow cables
- Aerostat tethers
- Wind and Tidal / Wave power cables
- Power, signal optic cables

After sales

Global product support

- Global product support
- Testing (hydro, electrical, optical, tensile)
- Repair / maintenance / re-termination
- Project specific spares / repair kits
- Integration
- Trouble shooting
- Supply chain sub-contract networks for special 3rd party parts

We are specialists in the design, testing and manufacture of bespoke cables and umbilicals for use in some of the planet's harshest, most demanding environments.

Our products have applications across many different market sectors, and our experienced team are always on hand to help develop a solution for almost any project.
