

Aerospace

Whilst most of our products are deployed in offshore projects, we have also been successful in supplying tethers and cables to the aerospace sector.

Aerostats have been around for many years, but the use of tethered drones is becoming more widespread, and our specialist ability to develop prototypes makes us the ideal partner for more innovative applications.

Applications

- Aerostat tethers
- Drone tethers
- Launch vehicle umbilicals

**OUR CABLES CAN
FACILITATE THE SEMI-
PERMANENT DEPLOYMENT
OF DRONES AND
AEROSTATS**
