

Aquaculture

No more diesel generators. Fibron has the expertise to supply bespoke power cables that connect the fish farm to onshore power supplies or to offshore renewable energy sources.

What's more, we can also design and manufacture umbilicals that comprise almost any combination of hoses and cables to deliver power, communication, video, data capture, environment monitoring, chemicals and nutrients from a central hub to each cage.

Applications

- Power-from-shore cables
- Power distribution cables
- Monitoring cables
- Hoses for chemicals
- Hoses for nutrients
- Hoses for cleaning and suction
- Cables for lighting systems
- Fibre-optic cables for video
- Data and communication cables
