

Defence

The Fibron team have considerable experience of delivering cables and umbilicals to the armed forces of several different countries within Europe, NATO and further afield. Many of our customers (not just those in the defence sector) prefer to work within the scope of a non-disclosure agreement, and the team at Fibron understand and support this need for discretion.

Members of Make UK Defence, we're ready to help with even the most complex projects.

Applications

- Tow cables
- Tether cables
- Mine counter-measure cables
- Submarine rescue umbilicals
- Electro-optical cables
- Research and sonar cables
- Underwater communications cables
