

Expert design

We actively engage with our customers during the design phase to understand how and where the products will be deployed. We can then determine the optimum specification of strength members, polymers and components to suit each specific application.

When required, we work with the appropriate third-party certification organisations to ensure that the manufactured products meet the desired specification. Often, the guiding document will be the ISO13628-5/API 17E Subsea Umbilical Standard, though we are happy to work to other standards as necessary.

**GOOD DESIGN COMES
FROM AN
UNDERSTANDING OF HOW
AND WHERE THE PRODUCT
WILL BE USED.**

Success factors

- Extensive industry experience
- Technical expertise
- Attention to detail
- Collaborative approach
