

Offshore energy

Fibron has a long-established reputation as a leading supplier of static and dynamic cables and umbilicals to the offshore energy sector.

The design and manufacture of bespoke umbilicals for IWOCs, SSIV, PLEM to buoy, jumpers, flying leads and production control are fundamental to this sector, but the offshore energy sector often requires diverse product solutions that don't always fall into recognised categories. Fibron has a wealth of experience in designing and manufacturing bespoke solutions for a range of other applications.

Applications

- Intervention umbilicals
- SSIV (Subsea Isolation Valve) umbilicals
- PLEM (Pipeline End Manifold) to buoy
- Jumpers
- Flying leads
- Production control
- ILUC (Internal Line Up Clamp) umbilicals
- Subsea tooling umbilicals and cables
- Piggyback cables
- Pile driving umbilicals
- BOP (Blow-out Preventer) umbilicals
- MUX (multiplex) cables
- ICCP (Impressed Current Cathodic Protection) cables
