

ROVs

Fibron provides an industry-leading range of cables and umbilicals for the safe and reliable operation of subsea Remotely Operated Vehicles.

Our thin-wall insulation technology allows for the design of cables with smaller diameters, saving both space and weight. We also have many years of experience in the design and manufacture of armouring packages that provide exceptional protection, strength and durability in even the harshest of environments.

Applications

- Observation class ROV umbilicals
- Work class ROV umbilicals
- Main lift umbilicals
- Tether cables
- Trencher cables
- Plough cables
- Crawler umbilicals
- Deep ocean research cables
- Remote intervention cables
- Subsea drill cables

**FIBRON'S CABLES AND
UMBILICALS CAN BE
INDEPENDENTLY TESTED
AND QUALIFIED TO THE
HIGHEST STANDARDS**
