

## Subsea mining

Fibron's wealth of experience in designing and manufacturing ROV cables transfers directly to applications in the subsea mining sector.

Our expert design team will incorporate the required combination of power cables, control and communications cables, hydraulic hoses, fibre-optics, armouring and more, to deliver an umbilical that performs flawlessly in even the most challenging environments.

### Applications

- Remotely operated vehicles
- Seafloor production tools
- Subsea excavators
- Subsea pumps
- Dredging equipment
- Monitoring equipment

**FIBRON SUPPLIES THE  
UMBILICAL AND  
TERMINATIONS TO THE  
PRECISE SPECIFICATION  
REQUIRED**
