

**Job title:** Extrusion Operator (experienced)

**Department:** Extrusion

**Reports to:** Extrusion Manager

**Salary:** Dependant on experience

### **Job summary**

Due to our continued growth and increased demand, we are seeking a skilled Extrusion Operator to join our experienced team. This is an excellent opportunity for an enthusiastic, proactive and driven person who has a keen interest in manufacturing and is looking to build a career with a reputable and well-established manufacturing company.

---

### **Key responsibilities**

#### **Polymer Extrusion Process Management**

- Oversee and manage the polymer extrusion process from raw material preparation to final product extrusion.
- Monitor and control extrusion parameters to ensure product quality and consistency.
- Troubleshoot and resolve any issues related to the extrusion process.

#### **Quality assurance**

- Implement and maintain quality control procedures for polymer extrusion.
- Conduct regular inspections to ensure adherence to quality standards.
- Collaborate with the quality assurance team to address any non-conformities.

#### **Process optimisation**

- Identify opportunities for process improvements to enhance production efficiency.
- Collaborate with R&D and engineering teams to implement new technologies and methodologies.
- Analyse data and performance metrics to optimize extrusion parameters.

#### **Equipment maintenance**

- Oversee the maintenance of extrusion equipment to ensure proper functioning.

- Schedule and coordinate preventive maintenance activities.
- Collaborate with the maintenance team for timely equipment repairs.

### **Collaboration and Communication**

- Work closely with cross functional teams, including production, R&D, and quality assurance.
  - Communicate effectively with team members to address challenges and implement solutions.
  - Provide technical guidance and support to production staff.
- 

### **Qualifications**

- Proven experience in polymer extrusion processes, preferably in a industrial setting.
  - Strong knowledge of polymer materials and their behaviour during extrusion.
  - Familiarity with quality control procedures and continuous improvement methodologies.
  - Excellent problem solving and troubleshooting skills.
  - Effective communication and collaboration skills.
  - Ability to work in a fast paced and dynamic environment.
- 

### **Preferred skills**

- Knowledge of safety and environmental regulations elated to the polymer extrusion.
  - Familiarity with the industry standards and best practices.
- 

### **Benefits**

- To be discussed at interview stage
- Free parking
- Free uniform
- Salary dependant on experience
- Overtime required at times

### **Schedule**

Monday to Friday 7am-3.30pm
